

Reserve Warehouse(Storage)

August 28, 2024

Roadmap

1. We receive basic information such as start and end dates, warehouse type for booking.
2. Warehouses that have no violations, not inactive, not booked between start and end dates (an algorithm is needed to detect this) and have good ratings and close to the person should be displayed.
3. The user registers a reservation request, for this purpose he must specify the start and end dates of the reservation.
4. A payment report will be recorded for the reservation, which includes the installment amounts and their number.
5. The warehouse owner must confirm the person's reservation on the mentioned date, if not confirmed within 24 hours, that removal request and a negative score for the warehouse owner must be registered.
6. To pay the installments, a message is sent to pay the installments, people can pay their installments in advance and if they don't pay, they will be indebted to the neighbor.
7. People can withdraw their request until they pay their first installment.
